BRAINFOLD

Nonogram practice: 6 original puzzles

A print-and-play set with a separate answer sheet.

Fill squares to match the numbered runs in each row and column.

Read row clues left to right, and column clues top to bottom.

Separate consecutive runs with at least one empty square.

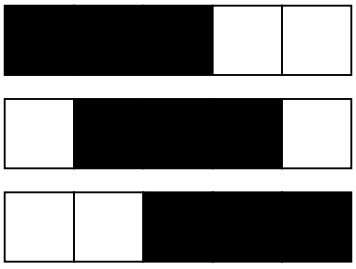
A clue of 0 means the whole line is empty. Mark empty squares with X.

Unmarked squares remain unknown until a deduction fixes them.

Sizes describe the grids; they are not measured human difficulty ratings.

One certain square

In a five-square row with clue 3, the filled run has three possible positions.



The middle square is filled in all three positions. The others are still unknown.
